CANDI – super protein paste

Description

CANDI super protein paste is a supplementary feed for bees, rich in glucose, fructose, protein and vitamins, with a natural preventive treatment based on essential oils against bee diseases. Candi can be used in any season, for stimulation between honey flows or during overwintering. It is made from cane sugar and sterilised pollen to eliminate any pathogenic element.

Composition

Fructose, glucose, sucrose, purified water, pollen (high crude protein content of 20%), vitamins, citric acid, vegetable fats, essential oils, minerals.

Packaging

Box of 10 bags of 1 kg.

Best-before date

12 months from the production date.

Storage conditions

-15°C to +30°C.
