# Stimulating protein paste – MOURAWID

## Description

The stimulating protein paste is a supplementary feed for bees, rich in glucose, fructose, protein and vitamins. This paste can be used in any season, for stimulation between honey flows or during overwintering. It is made from cane sugar and sterilised pollen to eliminate any pathogenic element.

## Composition

Sucrose, fructose, glucose, water, pollen, plant protein, vitamins.

## Analytical constituents

| Component | Amount (%) |
|-----------|------------|
| Sugar     | 81 %       |
| Water     | 10 %       |
| Pollen    | 08 %       |
| Protein   | 15 %       |
| Vitamins  | 01 %       |

## Packaging

Box of 10 bags of 1 kg.

## Best-before date

12 months from the production date.

## Storage conditions

Between -15°C and +30°C.
